## Liquid dispenser made of durAstatic E9

### Description

These bottles are made of permanent dissipative HDPE and are designed to protect your valuable static sensitive printed circuitry. They have a stainless steel pump and are suitable for clean rooms. The bottles do not have any migratory additives and reduces hence the chance for contamination from the bottle. Thanks to the long lasting dissipative properties there are no influence of the electrostatic properties by age or moisture.

### Technical specifications

Properties	Value	Methods / Standards
Surface resistance	$<1 \times 10^{11} \Omega$	IEC 61340-2-3
Decay time	$<2s$	
Static charge	$<100V$	

### Remarques

- Dispensers available in 120ml and 180ml bottles
- Available colours for 120ml: blue
- Available colours for 180ml: blue, yellow, green, red
- Do not overfill the dispenser bottle
